Supplemental Election/Restrictions

This application claims priority to provisional application Serial No. 60/268368.

Applicant's election of the invention of Group I, Claims 1-23 and 28 in Paper No. 7, submitted May 12, 2003 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

However, in view of the instant claims read on numerous patentably distinct agents (species), the Supplemental Restriction Requirement on species election as follows:

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention: numerous active agents, in Group I. See, e.g., claim 1.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of a single specific composition comprising a specified individual active compounds to be employed in the method of the treatment in Group I

for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1-21, and 28 are generic to a plurality of disclosed patentably distinct species. The claims read on the employment of various compounds or agents herein, with great diversity of chemical structure classified across class 424 and 514, the search for all of which presents an undue burden on the

Art Unit: 1617

Office. It is noted that a reference to one individual agent would not be a reference to another individual agent under 35 U.S.C.103.

A "specie" is a specific compound or treatment, with all parameters and/or substituent variables FULLY accounted for.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1617

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
